HEALTHCARE
CLEANING
MODULE

Ideal for independent use in public buildings, airports, shopping centres, universities...or in combination with other Healthcare Station products.

- Approved and certified sanitization cabine.
- High capacity nebulizer module for multi-product spraying use.
- Spraying solution: Saniwhater® sanitizing water.
- Designed under the Regulation n°1272/2008 (CLP) among other Regulations and Directives that regulate this type of chemical compound, which is catalogued as NON-HAZARDOUS, NON-TOXIC SANITIZER and APPROPRIATE to be applied on people.
-

ELECTRONIC MODULE

The sanitization cabine has an electronic module that allows:

- Continuous measurement of the dosed product to detect unauthorised manipulation of the device's product tank.
- Continuous measurement of the product in the cabin environment.
- Control of start up, alarms, stop and/or warning according to the case.
- Traceability and monitoring of the Saniwhater® product from the factory to the application on the user
- Control by QR codes of all personnel in contact with the product, the system and the service provided

The cabins come with a maintenance contract based on the estimated maximum daily number of people flow and includes the services of refilling, cleaning and maintenance by authorized personnel.
