crambo

CRAMBO PEOPLE COUNTER

Manages the flow of people entering an establishment in an agile and innovative way
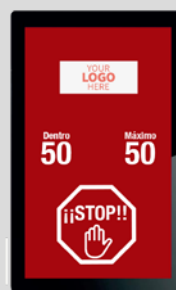

Our solution is composed of an IP camera and a customizable information screen with access allowed or denied software, manages the total capacity control for any company type or size.

Thanks to Artificial Intelligence and its powerful algorithm, it reliably counts the passage of people and the distance in real time, fulfilling the established protocols.

The software controls the data and shows them on the screen in real time through a customized interface that includes the logo:

Green light: Access allowed. Less than the maximum capacity allowed

Red light: Access denied. Equal or full capacity

- Simple configuration. Maximum capacity allowed
- CCAforo Hub*
- 10.1" or 15.6" screen
- Up to 2m door width

- Automatic alert when maximum capacity has been exceeded
- Installation: Self-supporting bracket
- Accuracy up to 94%**

* Only included with 15,6 " screen
** Provided that the camera is correctly installed and with sufficient

Real-time • Automatic Control • Reliable • Easy to install

Public administration, pharmacies, shopping centers, **superm**arkets, **restaurants,** gyms, stores, banks...
