Transform any standard camera into a professional broadcast PTZ camera

PTR-10 MARK II

Robotic Pan Tilt Head

PTR-10T MARK II

HDBaseT Robotic Pan Tilt Head

Datavideo's brand-new PTR-10 Mark II is a robotic pan-tilt head that is designed to turn any small size video cameras or block cameras into a PTZ camera.

A sleek design fits seamlessly in your studio. With its weight of 3.4 Kg, it can be placed on the heavy-duty tripod or mounted on the wall and ceiling which bring up a lot of flexibilities for your video production.

The PTR-10 Mark II can be controlled by IR controller, VISCA protocol controller, Datavideo RMC-180 Camera controller, RMC-300A Universal Remote-Control Panel, and compatible with serial or Ethernet (DVIP).

- Strong and sturdy aluminum frame
- Various interfaces: SDI, HDMI, RS-232, RS-422, DVIP/HDBaseT, Tally, LANC
- Multiple choices of controllers: RMC-180, RMC-300A, HS-1600T
- Tally light built-in
- D-tap connector for DC output
- Selectable DC voltage output for different cameras (7.4 / 8.4 / 10 / 12V)
- Support optional Datavideo ZEK-1 Zoom Encoder Kit, to detect and read out the Zoom position of cameras on top
- Control Sony, Panasonic, Canon, JVC cameras
- Zoom, Focus, IRIS, Shutter, white balance mode, all these frequently used functions, can be easily controlled by Datavideo' s remote controllers

Cost-Effective

Marketed at competitive price point, PTR-10(T) Mark II makes it very affordable to upgrade your studio existing cameras for multi-camera remote productions.

Turn camcorder into PTZ

Control of Pan, Tilt, Zoom. Supports Zoom control of various brand lens. With the optional accessories, Zoom Encoder Kit (ZEK-1) is the solution to your free running Zoom cameras. ZEK-1 converts zoom information and send back for controller to memory and recall the saved zoom position.

Wide Range of Compatible Cameras Supported

The PTR-10(T) Mark II implements LanC control that is compatible with a wide range of professional video camcorders, allowing you to select the best camcorders for your needs.

Panasonic Camera

Sony Camera

Light Weight, Strong, and Sturdy design

With a weight of 3.4 kg, PTR-10(T) Mark II is built from aluminum alloy, making it a very sturdy base for your camera. It can support cameras up to 4 kilograms.

Diversified Controller Options

Compatible with Serial, Ethernet, and LANC. Datavideo RMC-180, RMC-300A, and HS-1600T series will fit your need.

HS-1600T

RMC-300A

RMC-180

Built-in Tally light

With the big tally light in the front to show the status of your camera.

D-tap connector for DC output

D-tap connector is widely used in broadcast industry, especially for those accessories that are provided from 3rd parties, to convert d-tap into required battery type. Now you can easily find 3rd party power cable adaptor to power up your camera.

And we still provide the D-tap to DC 5.5mm with lock power cable (included) for our own block cameras.

DVIP Control with RMC-300A

Optional Accessories

ZEK-1

Zoom Encoder Kit

ZEK-1 is the solution to your free running Zoom cameras. PTR-10 Mark II can read its own Pan/Tilt movement and send back to controller for position memory and recall. Now, with ZEK-1, it can detect and read out the Zoom changes. And convert those information into Zoom position to send back for controller to memory and recall the saved zoom position. Compatible with cameras via zoom moving ring.

How does ZEK-1 work?

ZEK-1 can read out the spin change of the Zoom ring on camera by contacting the ZEK-1 gear on to the Camera zoom ring. So the gear must fit tight and steady with camera zoom ring to achieve best accuracy.

M0.8 gear is mounted on the Zoom encoder while shipped, it can work with camera with M0.8 gears(usually the cinema lenses), or it can also work with gear ring belt.

If the camera is designed with M0.6 Gear, we also included the M0.6 Gear to exchange. Sony X200, Z280 and some other camera with Fujinon lenses has M0.6

Camera Mount Plate

The larger mounting plate from ZEK-1 gives more space for you to mount the camera

M0.6 Gear

If you are using Cameras with M0.6 gears on the zoom ring (ex: Sony X200), the additional M0.6 gear can directly match with the Lens

Metal Bar & Bar Holder

The metal bar holds the zoom encoder in place.

Zoom Encoder(M0.8 gear)

The gear should engage with the camera's zoom ring and the 4-pin mini-DIN connector should be connected to the Zoom Sensor port on the PTR-10/10T MARK II.

Gear Ring Belt designed for M0.8 gear

Wrap the gear ring belt around the zoom ring if your camcorder's zoom ring is neither M0.6 nor M0.8 on the PTR-10/10T MARK II.

Compatible with the most of cameras via zoom moving ring except

1. One ring design
2. Zoom ring blocked by the servo motor box

For more information about compatible cameras, please go to our website.

Optional Accessories

On the wall

WM-11

Professional Wall Mount for Robotic Pan Tilt Head

Weight of the WM-11 : 4.0 Kg
Maximum Load Weight Limit : 50 Kg

The WM-11 is a professional wall mount which is designed for Datavideo Robotic Pan Tilt Head PTR-10/PTR-10T Mark II and Datavideo PTZ camera series including PTC-150/PTC-150T. The WM-11 is made of 6063 Aluminum and 3mm carbon steel plate, making it possible to hold up to 10kg and still maintain absolute stability. The Metal expansion screws which come with WM-11 guarantee to hold the mount like a rock. With the powerful torque from PTR-10/10T Mark II, it is necessary to use such a professional and strong mount like WM-11. Moreover, the WM-11 provides three bubble level meters for users to measure while mounting it onto the wall.
